

Mamdouh Ali Hamza

Data Analyst - BI Specialist

Email: mamdouh.ali.hamza@gmail.com **Phone:** +201006087260 **Address:** Al-Munib, Giza
Website: mamdouh-ali-hamza.github.io **Linkedin:** [mamdouh-ali-hamza](https://www.linkedin.com/in/mamdouh-ali-hamza) **Github:** [mamdouh-ali-hamza](https://github.com/mamdouh-ali-hamza)
Military Status: Completed (3 years, IT Officer)

SUMMARY

I have developed a high level of proficiency in Data Analysis and Business Intelligence (BI) with a strong academic background in computer engineering. My skills in these areas enable me to effectively analyze and derive valuable insights from complex datasets.

EXPERIENCE

Business Intelligence Specialist, ITI

(Nov 2022-Mar 2023)

Intensive Code Camp Internship:

- Query, design, and manage databases.
- Design and develop data models.
- Employ various ETL and data warehouse concepts.
- Create dashboards and reports.

EDUCATION

Faculty of Engineering - Helwan University

(2018)

Bachelor of Computer Engineering

CERTIFICATES

- Business Intelligence, and Advanced Data Analytics, **Google**
- Data Analyst, **Udacity**
- Machine Learning Specialization, **Coursera**
- Advanced & Professional Data Analysis, **Egypt FWD**

TECHNICAL SKILLS

- Data Analysis & Visualization: Python, R, Excel
- BI tools: Power BI, Tableau
- SQL, SSRS, SSIS, SSAS, MS SQL Server
- Statistics, Machine Learning

INTERPERSONAL SKILLS

- Fast and continuous learner
- Searching skills
- Adaptive
- Critical and analytical thinking
- Active listener
- Communication skills

PROJECTS

- **[Ford GoBike System Data Findings](#)**: Conducting an exploratory data analysis on Ford GoBike System Data and using Python data science and data visualization libraries to explore the dataset's variables and understand the data's structure and relationships.
- **[AdventureWorks Data Visualization](#)**: Making analysis on a Schema in AdventureWorks Data Warehouse Using Tableau by creating detailed dashboards in a story with navigation buttons.
- **[Finding Donors for CharityML](#)**: Building an algorithm to identify potential donors best and reduce the overhead cost of sending mail by evaluating and optimizing several supervised machine learning algorithms to determine which algorithm will provide the highest donation yield while reducing the total number of letters sent.
